Blind Cleaning Beyond the Basics: Recertification More Advanced Techniques/Production Cleaning/Commercial/Repairs for Lead Cleaner(s), Managers, Owners (NOT for novice cleaners)

Inquire if interested. Class will be offered if we get 4+ companies committed etc.)

Connect - Review & Revamp: Recertification For Owners, Managers a "Boot Camp for your Business"
Prerequisites: At least 4 days of previous blind cleaning specific training or certification classes

February 17-18 Fri/Sat April 28-29 Fri/Sat June 12-13 Mon/Tues

To maintain one's certification status active Members are required to complete at least 10 CEU's in person or 12 CEU's remotely every two years from approved classes/programs. *(List above and others)*

For initial certification one attends either the Basic Ultrasonic Blind Cleaning training or the OnSite Fabricare Specialist training, depending upon your preferred cleaning method. For companies with more than 5 full time employees at least two customer facing employees should be Certified.

For the first recertification cycle of an OnSite Fabricare Specialists a repeat of the OnSite Fabricare Specialist training is highly recommended. Two other options exist for recertification cycles besides remote webinars. The Blind Cleaning Beyond the Basics training is more focused on practical operational things and less focused on marketing and business metrics (for lead cleaners, managers, owners). The Connect-Review & Revamp training is geared more for owners and managers with more of a focus on one's blind cleaning business metrics and less hands on cleaning.

Program Notes:

Events are hosted at our facility in the Chicagoland area and confirmed by receipt of paid reservation fees at least 2 weeks prior to the class (first come/first serve as space permits).

Those that clean both ultrasonically and with injection-extraction may save money by booking back to back basic certification sessions and paying full price for the first one and \$300 per person for the second one. Be sure to clearly register for both.

Basic Ultrasonic and OnSite Fabricare Trainings are limited to 6 companies (or 12 people as a general rule).

Recertification Sessions are limited to 12 Companies (or 18 people).

A list of local hotels is available for planning purposes. We are located about an hour from either Chicago Airport.
